

Lab05 Contours

1. Image Exploration

Above are the blue, green and red channels splitted from the original image. Below are the hue, saturation and value images split from the original image as well.

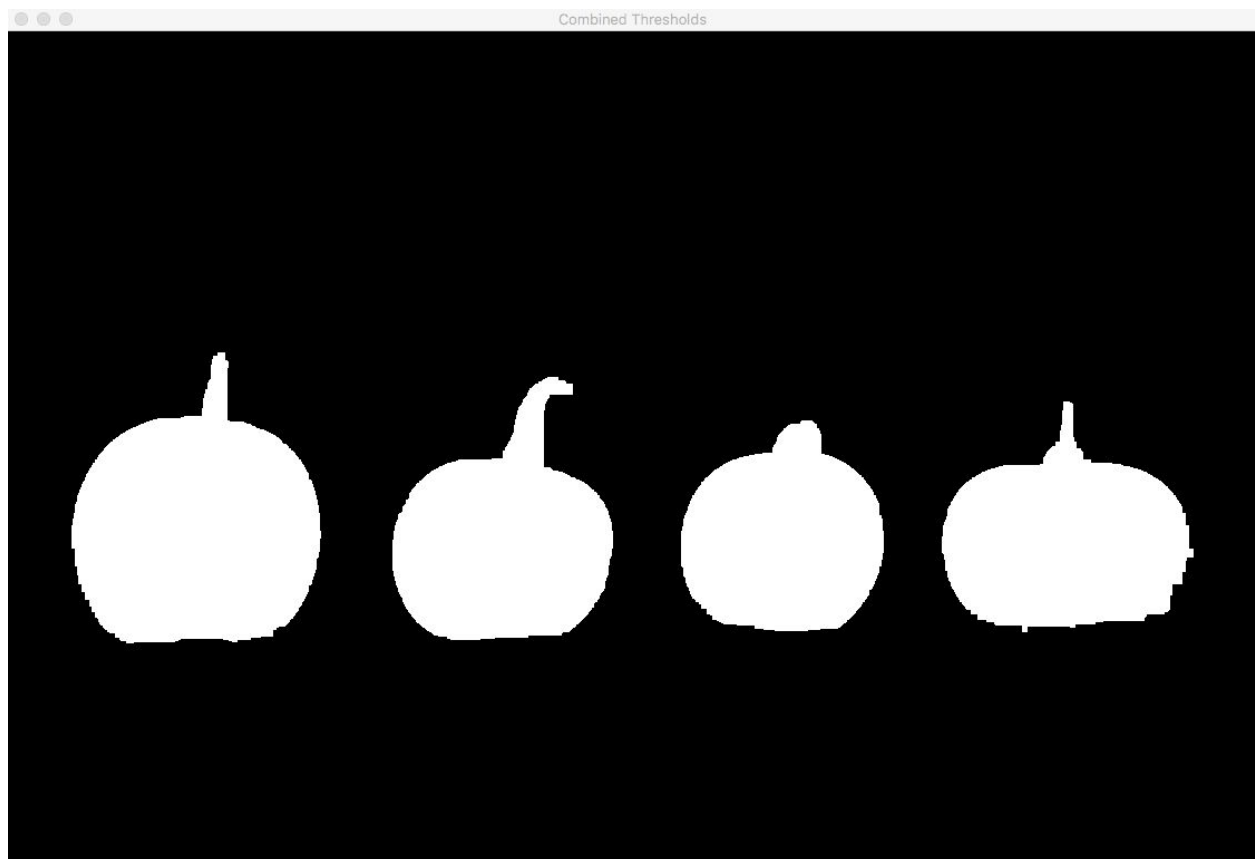

← 2. Threshold on Hue ←

→ 3. Threshold on Saturation →

4. Morphological Operations for Cleanup

5. Contours

I found 4 pumpkins

I also tried out the first challenge but had a tough time understanding how to call a new contour function so that the numbers would get circled. It's in the code and it runs but its commented out and I didn't take screenshots of it.
